

Northern Arizona Healthcare now offers transcranial magnetic stimulation (TMS) for treatment-resistant depression. NAH is the only organization which offers Neurostar TMS services in the northern Arizona Region.

TMS is a noninvasive procedure that uses magnetic fields to stimulate nerve cells in the brain to improve symptoms of depression. TMS is typically used when other depression treatments haven't been effective.

NAH Behavioral Health: **928-213-6415**

Scan the QR code to assess your depression and find out if TMS is right for you.
