WEIGHT MANAGEMENT GROUP

This weight management series is a 12-week virtual group series that will help patients and colleagues achieve their weight goals. The group provides accountability, insight and ideas, and invaluable social support.

The series is divided into three essential aspects of change. You will be asked to attend each session and practice the skills learned at home between sessions. As a participant, you will make diet and exercise changes that are appropriate for your individual needs and we will monitor your weight and body composition changes.

You will learn that, by making small but effective changes to how you manage your health, you can achieve long-lasting results.

Please check to see if these sessions are covered under your insurance policy. A primary care provider referral is required.

Psychologist Sherri Ruggiero, PhD, has helped countless participants achieve long-term weight loss with this program since 2015. Contact Dr. Ruggiero at Sherri.Ruggiero@NAHealth.com for more information and to find the next dates and times the group will be offered.
